DETAILED ACTION

Drawings

1. The drawings submitted have been reviewed and determined to facilitate understanding of the invention. The drawings are accepted as submitted.

Allowable Subject Matter

2. Claims 14-20 are allowed.
3. Claims 14-20 describe a bi-stable molecular switch having one rotor portion between two stator portions that rotates between at least two different states upon application of an electric field inducing a band gap change.
4. U.S. Patent No. 6,128,214 to Kueckes et al. describes a bi-stable molecular switch having one rotor portion that rotates between at least two different states upon application of an electric field. Kueckes et al. does not describe the rotor portion between two stator portions or a band gap change.
5. U.S. Patent No. 6,128,214 to Kueckes et al. remains the closest prior art of record in this application. For the reasons stated above, however, Claims herein are deemed to patentably distinguish over Kueckes et al. and all other prior art of record.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent No. 6,198,655 to Heath et al. describes a bi-stable molecular switch.
7. Prior art documents submitted by applicant in the Information Disclosure Statement filed on 07 July 2004 have all been considered and made of record (note the attached copy of form PTO-1449).
